Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-6, 8-12, 14-18 and 20-25 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat No 6,665,841 (Mahoney et al), hereafter Mahoney.

Claims 2, 8, 14, 20 and 25:

Mahoney discloses:

a request source recognizing unit recognizing said request source [col 31, lines 1-40]

a control information recording unit recording control information related to data restricted by an administrator of the data from being provided depending on said request source [col 31, lines 1-40]

an edit creating unit creating the response data corresponding to the request data in accordance with the control information by preventing an area restricted by the administrator of the data from being provided to said request source [col 31, lines 1-40]

a transmitting unit providing the response data [col 31, lines 1-40]

Claims 3, 9, 15 and 21:

Mahoney discloses wherein the control information contains information for identifying said request source, and designating information for designating a data area restricted by the administrator of the data from being provided to said request source [col 31, lines 1-40]

Claims 4, 10, 16 and 22:

Mahoney discloses wherein the designating information is display area information for indicating the area restricted by the administrator of the data from being provided [col 31, lines 1-40]

Claims 5, 11, 17 and 23:

Mahoney discloses wherein when the data is an image, the designating information designates a partial image, specifying an object restricted by the administrator of the data from being provided, in this image [Fig 8]

Claims 6, 12, 18 and 24:

Mahoney discloses further comprising an input unit setting the control information [Fig 1]

Applicant's arguments filed 12/18/2007 have been fully considered but are not persuasive for the following reasons.

Applicant argues that Mahoney does not disclose "an administrator of the data."

Examiner is not persuaded. Applicant fails to provide a specific and deliberate definition of "administrator" and thus examiner is required to give the term its broadest reasonable interpretation based on a common dictionary. A common dictionary (Webster's New World Dictionary, College Edition, Fourth Edition) defines "administrator as "one who manages or directs." Clearly the "user" referenced by Mahoney performs functions such as managing and directing and thus can be characterized as an administrator.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
